SQL

Notes

* SQL stands for Structured Query language
* Used to store, manage and retrieve data
* Works with databases like MySQL, Oracle, SQL server

* Types of SQL commands :-

1. DDL (Data Definition Language)
2. DML (Data Manipulation Language)
3. DQL (Data Query Language)
4. DCL (Data control language)

* Common SQL commands :-

CREATE
INSERT
SELECT
UPDATE
DELETE

* Basic SQL syntax :-

```
SELECT column-name
FROM table-name
WHERE condition;
```

Eg:

ID	Name	Mark
1	Asha	85
2	Ravi	78
3	Shaya	90

Example queries

✓ Select all data

SELECT * From student;

✓ Select specific columns

SELECT Name, Marks FROM Student;

✓ Use condition

SELECT * FROM Student WHERE Marks > 80;

Aggregate Functions

Functions	use
Count ()	Count rows
SUM ()	Total
AVG()	Average
MAX()	Highest value
MIN()	Lowest value

* Key Points

- SQL is case-sensitive
- Always ends queries with ;
- * means columns
- Conditions use operators like =, >, <, LIKE
